

Water Quality Webinars

The Water Education Alliance for Horticulture, UF IFAS Extension, and experts from universities and industry are presenting a series of webinar topics to help growers conserve, recirculate, and treat irrigation water.

Registration is free at watereducationalalliance.org (click on “workshops”). The 45-minute presentations will run at noon EDT on the following Tuesdays:

		Topic	Presenter
29-Nov	1	Best Management Practices for water conservation	Tom Yeager (University of Florida)
6-Dec	2	Biology of waterborne pathogens	Gary Chastagner (Washington State University)
13-Dec	3	A Systems Approach for Managing Phytophthora Diseases in Nurseries: the Importance of Water.	Jennifer Parke (Oregon State University)
20-Dec	4	Monitoring water quality	Paul Fisher (University of Florida)
10-Jan	5	Filtration and avoiding clogging of irrigation lines	(Dramm Water)
17-Jan	6	Surface cleaning and sanitation	Warren Copes (USDA-ARS)
24-Jan	7	Algae control and pond management	Ken Wagner (Water Resources Services)
31-Jan	8	Pro and cons of water disinfection techniques: A European perspective	Walter Wohanka (Geisenheim Research Center, Germany)
7-Feb	9	Designing water treatment systems	Paul Fisher (University of Florida)
